

OL3-Cesium: 3D pour OpenLayers

Guillaume Beraudo

Ingénieur Opensource
Camptocamp, Suisse

FOSS4G^{fr}, 11 mai 2016

Objectif

Synchronizer une carte OpenLayers et un globe 3D Cesium

Chemin de randonnée - carte OL3

Chemin de randonnée - carte OL3

- ▶ Au pixel près
- ▶ Projection Suisse
- ▶ Léger, rapide, fonctionnel...

Même chemin de randonnée - globe Cesium

Même chemin de randonnée - globe Cesium

- ▶ 3d: nouveau point de vue
- ▶ Terrain, (ombres, modèles...)
- ▶ WebGL

OL3-Cesium

- ▶ Asservi à OL3
- ▶ Compilé avec OL3
- ▶ Réutilisable, maintenu, à jour

OL3-Cesium

- ▶ Asservi à OL3
- ▶ Compilé avec OL3
- ▶ Réutilisable, maintenu, à jour

Visible en live sur [SuisseMobile 3D](#)

Howto

- Pour démarrer

```
var ol3d = new olcs.OLCesium({map:  map})  
ol3d.setEnabled(true)
```

Howto

- ▶ Pour démarrer

```
var ol3d = new olcs.OLCesium({map:  map})  
ol3d.setEnabled(true)
```

- ▶ [Exemples OL3-Cesium](#)

Howto

- ▶ Pour démarrer

```
var ol3d = new olcs.OLCesium({map:  map})  
ol3d.setEnabled(true)
```

- ▶ Exemples OL3-Cesium
- ▶ Géoportail de la confédération Suisse ([code source](#))

Fonctionnement interne

- ▶ `olcs.OLCesium`

Fonctionnement interne

- ▶ `olcs.OLCesium`
- ▶ `olcs.AbstractSynchronizer`
 - ▶ `olcs.RasterSynchronizer`
 - ▶ `olcs.VectorSynchronizer`

Fonctionnement interne

- ▶ `olcs.OLCesium`
- ▶ `olcs.AbstractSynchronizer`
 - ▶ `olcs.RasterSynchronizer`
 - ▶ `olcs.VectorSynchronizer`
- ▶ `olcs.FeatureConverter`

Challenges et solutions

- ▶ Cesium vide la batterie

Challenges et solutions

- ▶ Cesium vide la batterie
- ▶ Reprojection de rasters

Challenges et solutions

- ▶ Cesium vide la batterie
- ▶ Reprojection de rasters
- ▶ Lignes sur le terrain

Challenges et solutions

- ▶ Cesium vide la batterie
- ▶ Reprojection de rasters
- ▶ Lignes sur le terrain
- ▶ Clusters raster

Clusters 3D vectoriels

Visible sur [SuisseMobile](#)

- ▶ 30'000 points au lieu de reprojeter le raster
- ▶ Prégénéré par [ol3-cluster-tool](#)
- ▶ Picking, données envoyées sur le GPU puis décimées par le shader

The screenshot shows the GitHub repository page for `openlayers/ol3-cesium`. At the top, the repository name is displayed with navigation links for Code, Issues (54), Pull requests (1), Wiki, Pulse, Graphs, and Settings. On the right, there are buttons for Unwatch (46), Star (103), and Fork (43). Below the repository name, the text "OpenLayers - Cesium integration" is followed by a link to the repository and an "Edit" button. A progress bar shows 778 commits, 5 branches, 16 releases, and 13 contributors. Below the progress bar, there are buttons for "Branch: master", "New pull request", "New file", "Upload files", "Find file", "SSH", "git@github.com:openlayers/ol3-cesium.git", and "Download ZIP". A recent pull request by `gberaudo` is highlighted, titled "Merge pull request #351 from gberaudo/prepare_release", with the latest commit `a6a4f27` from 27 days ago. Below the pull request, a file named `build` is listed, with a description "Port to OL 3.15.0" and a date "25 days ago".

► Continuer les releases mensuelles

The screenshot shows the GitHub repository page for `openlayers/ol3-cesium`. At the top, the repository name is displayed with navigation links for Code, Issues (54), Pull requests (1), Wiki, Pulse, Graphs, and Settings. On the right, there are buttons for Unwatch (46), Star (103), Fork (43), and a small '43' badge. Below the navigation bar, the text 'OpenLayers - Cesium integration' is followed by the repository URL and an 'Edit' link. A progress bar shows 778 commits, 5 branches, 16 releases, and 13 contributors. Below the progress bar, there are buttons for 'Branch: master', 'New pull request', 'New file', 'Upload files', 'Find file', 'SSH', the repository URL, and 'Download ZIP'. A recent pull request by 'gberaudo' is highlighted, showing it merged from 'prepare_release' and the latest commit 'a6a4f27' from 25 days ago. Below this, a file named 'build' is listed with the description 'Port to OL 3.15.0'.
